

SUPERGENIUS

PITCH DECK 2025

ABOUT US

SuperGenius is your trusted partner in game development, offering full-spectrum art and animation support for AAA and indie titles. With nearly two decades of experience, we provide reliable, creative support for projects of every scale and style, ensuring your vision is realized to the highest standard. Our artists excel in crafting compelling characters, immersive environments, dynamic animations, and stunning visual effects - seamlessly integrating into your pipeline. We push creative boundaries while maintaining quality and efficiency. Whether you're developing for Unreal, Unity, or proprietary engines, SuperGenius is ready to bring your vision to life.

OUR SERVICES

We offer full pipeline support for games, including:

SOME OF OUR CLIENTS

RECENT WORK

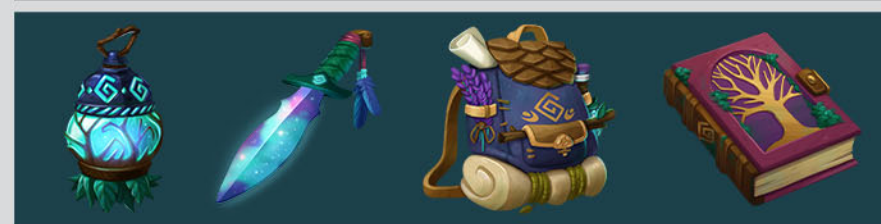

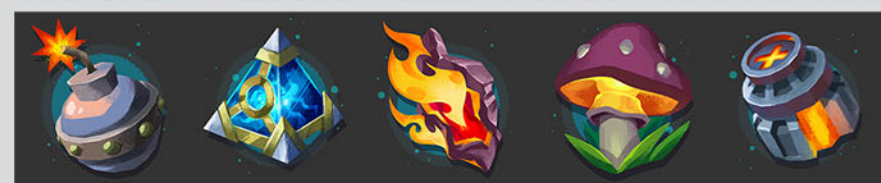

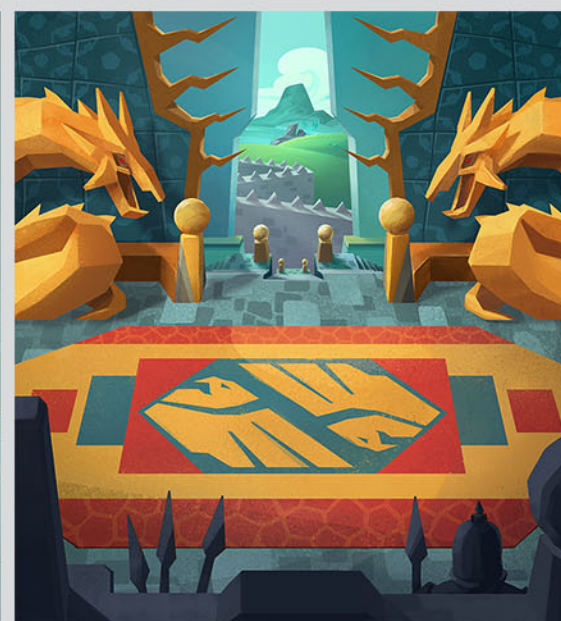

Over the years, our studio has had the privilege of contributing to a wide range of titles, from AAA blockbusters to beloved indie classics. Chances are you've already played or heard of a few. Below is a snapshot of recent / notable projects - each one showcases the variety, skill, and attention to detail that our teams bring to every assignment.

CONCEPTS

From early sketches to polished production sheets, our concept team lays the foundation for unforgettable worlds and characters. We cover a full range of offerings - characters, creatures, props, weapons, vehicles, and environments - tailored to fit your project's needs. Whether you require quick ideation to explore possibilities, or detailed orthographics to guide production, we deliver visuals that bring clarity and inspiration to every stage of development.

Our artists thrive on both stylized and realistic approaches, able to adapt seamlessly to established IPs or help you define an original visual identity from the ground up. With a strong focus on look development and rapid iteration, we are your problem-solvers - refining and pushing ideas until they resonate. The result is concepts that set the tone for what comes next, excites your team, and makes your project stand out from the rest.

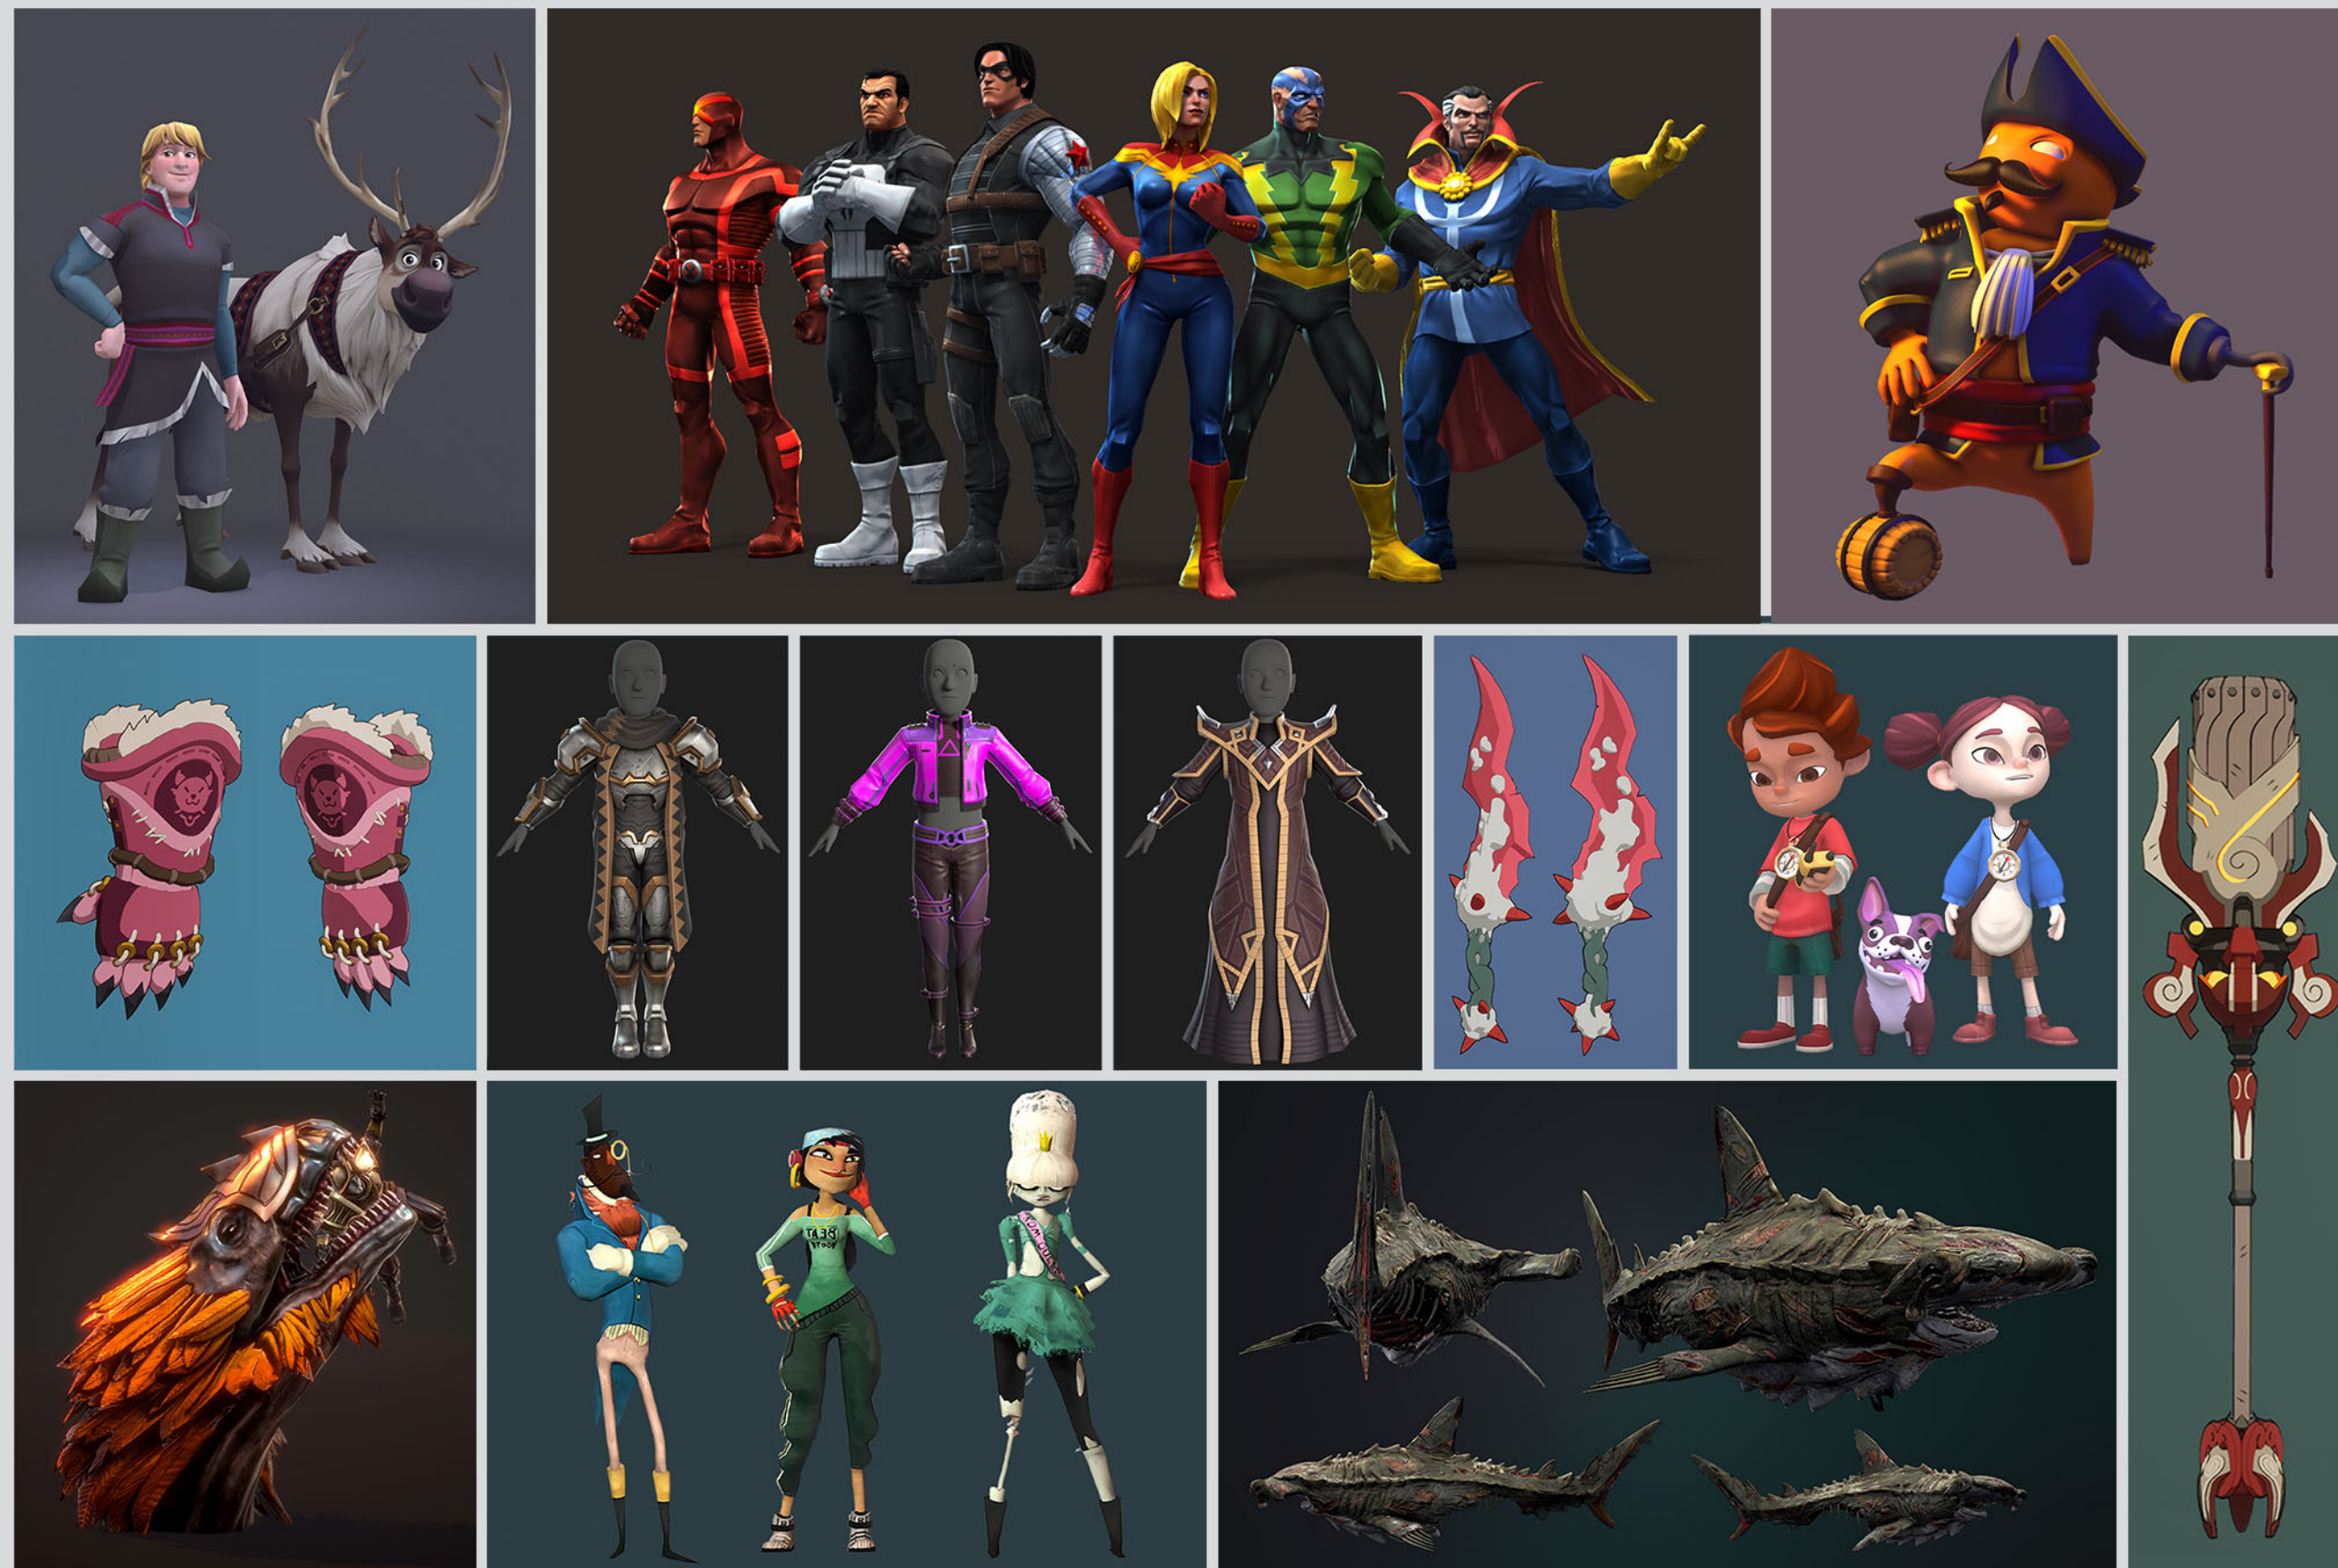

CHARACTERS

Our character team brings heroes, villains, and creatures to life with precision and personality. From hyper-realistic digital doubles to stylized fantasy casts, we balance artistic vision with technical execution. High-resolution sculpts capture every detail, while optimized game-ready meshes ensure characters move fluidly across platforms (mobile, console, VR and next-gen).

SuperGenius artists are fluent in the full material spectrum, from hand-painted stylization to PBR realism, and skilled in delivering everything from expressive heads to full-body turnarounds with costume and gear variations. With a deep grasp of anatomy, topology, and performance constraints, our team of artists translate imagination into models that feel alive and ready for the spotlight.

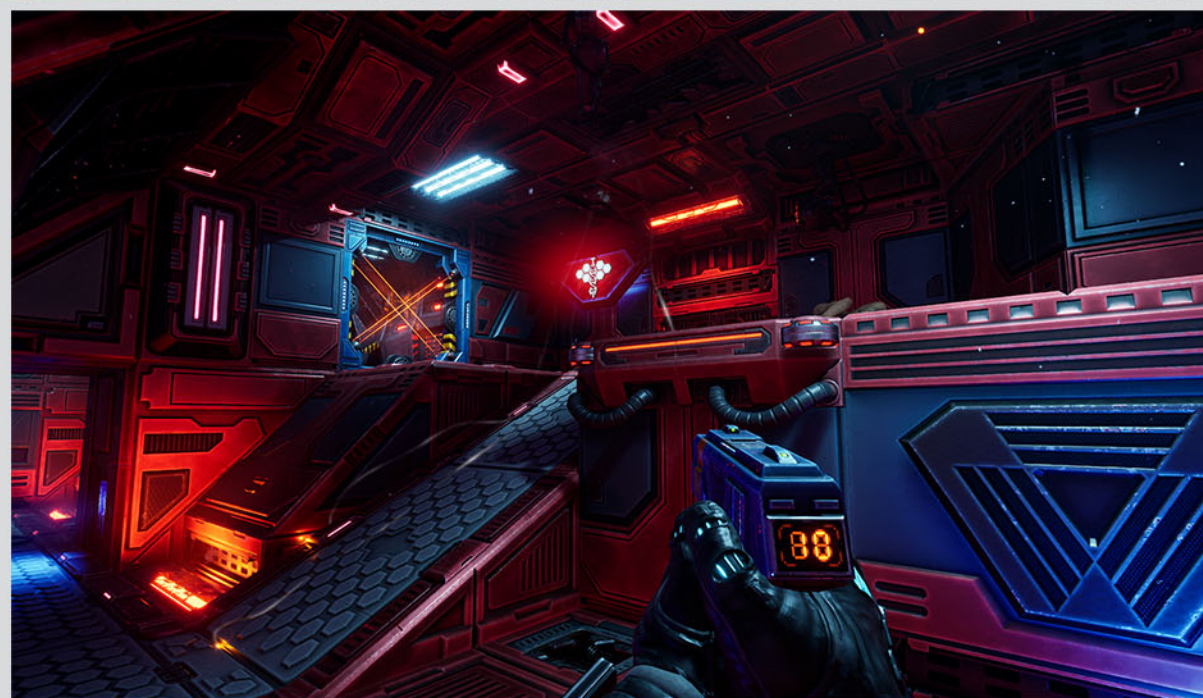

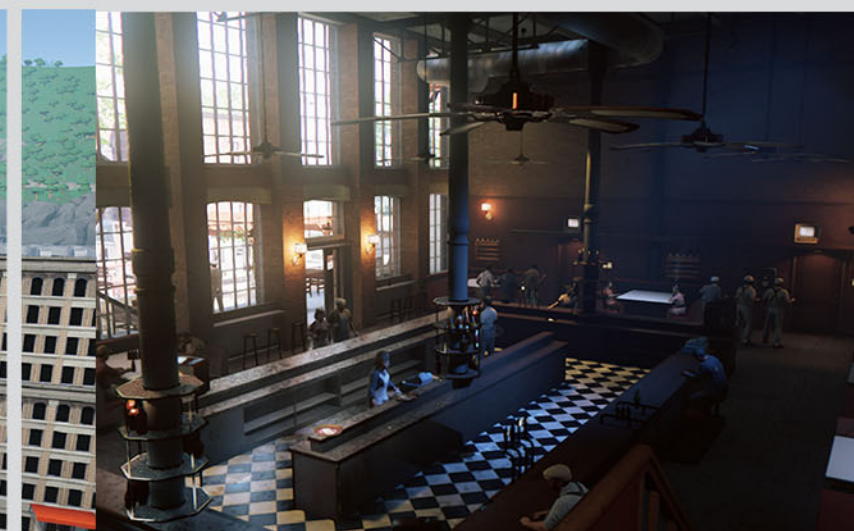

ENVIRONMENTS

Environments are more than backdrops and set-pieces, they're storytelling devices. Our environment artists build immersive spaces that ground the player in your world, whether it's a vast open landscape, a dense urban scene, or an intimate interior. We excel in modular asset creation, foliage and natural elements, and hard-surface design, ensuring every space feels cohesive and production-ready.

From hand-painted stylized worlds to photorealistic PBR scenes, we deliver environments optimized for Unreal, Unity, and proprietary engines alike. Our team balances visual fidelity with technical performance, providing everything from hero set pieces to efficient LOD models. The result is environments that look stunning and function seamlessly within your gameplay vision.

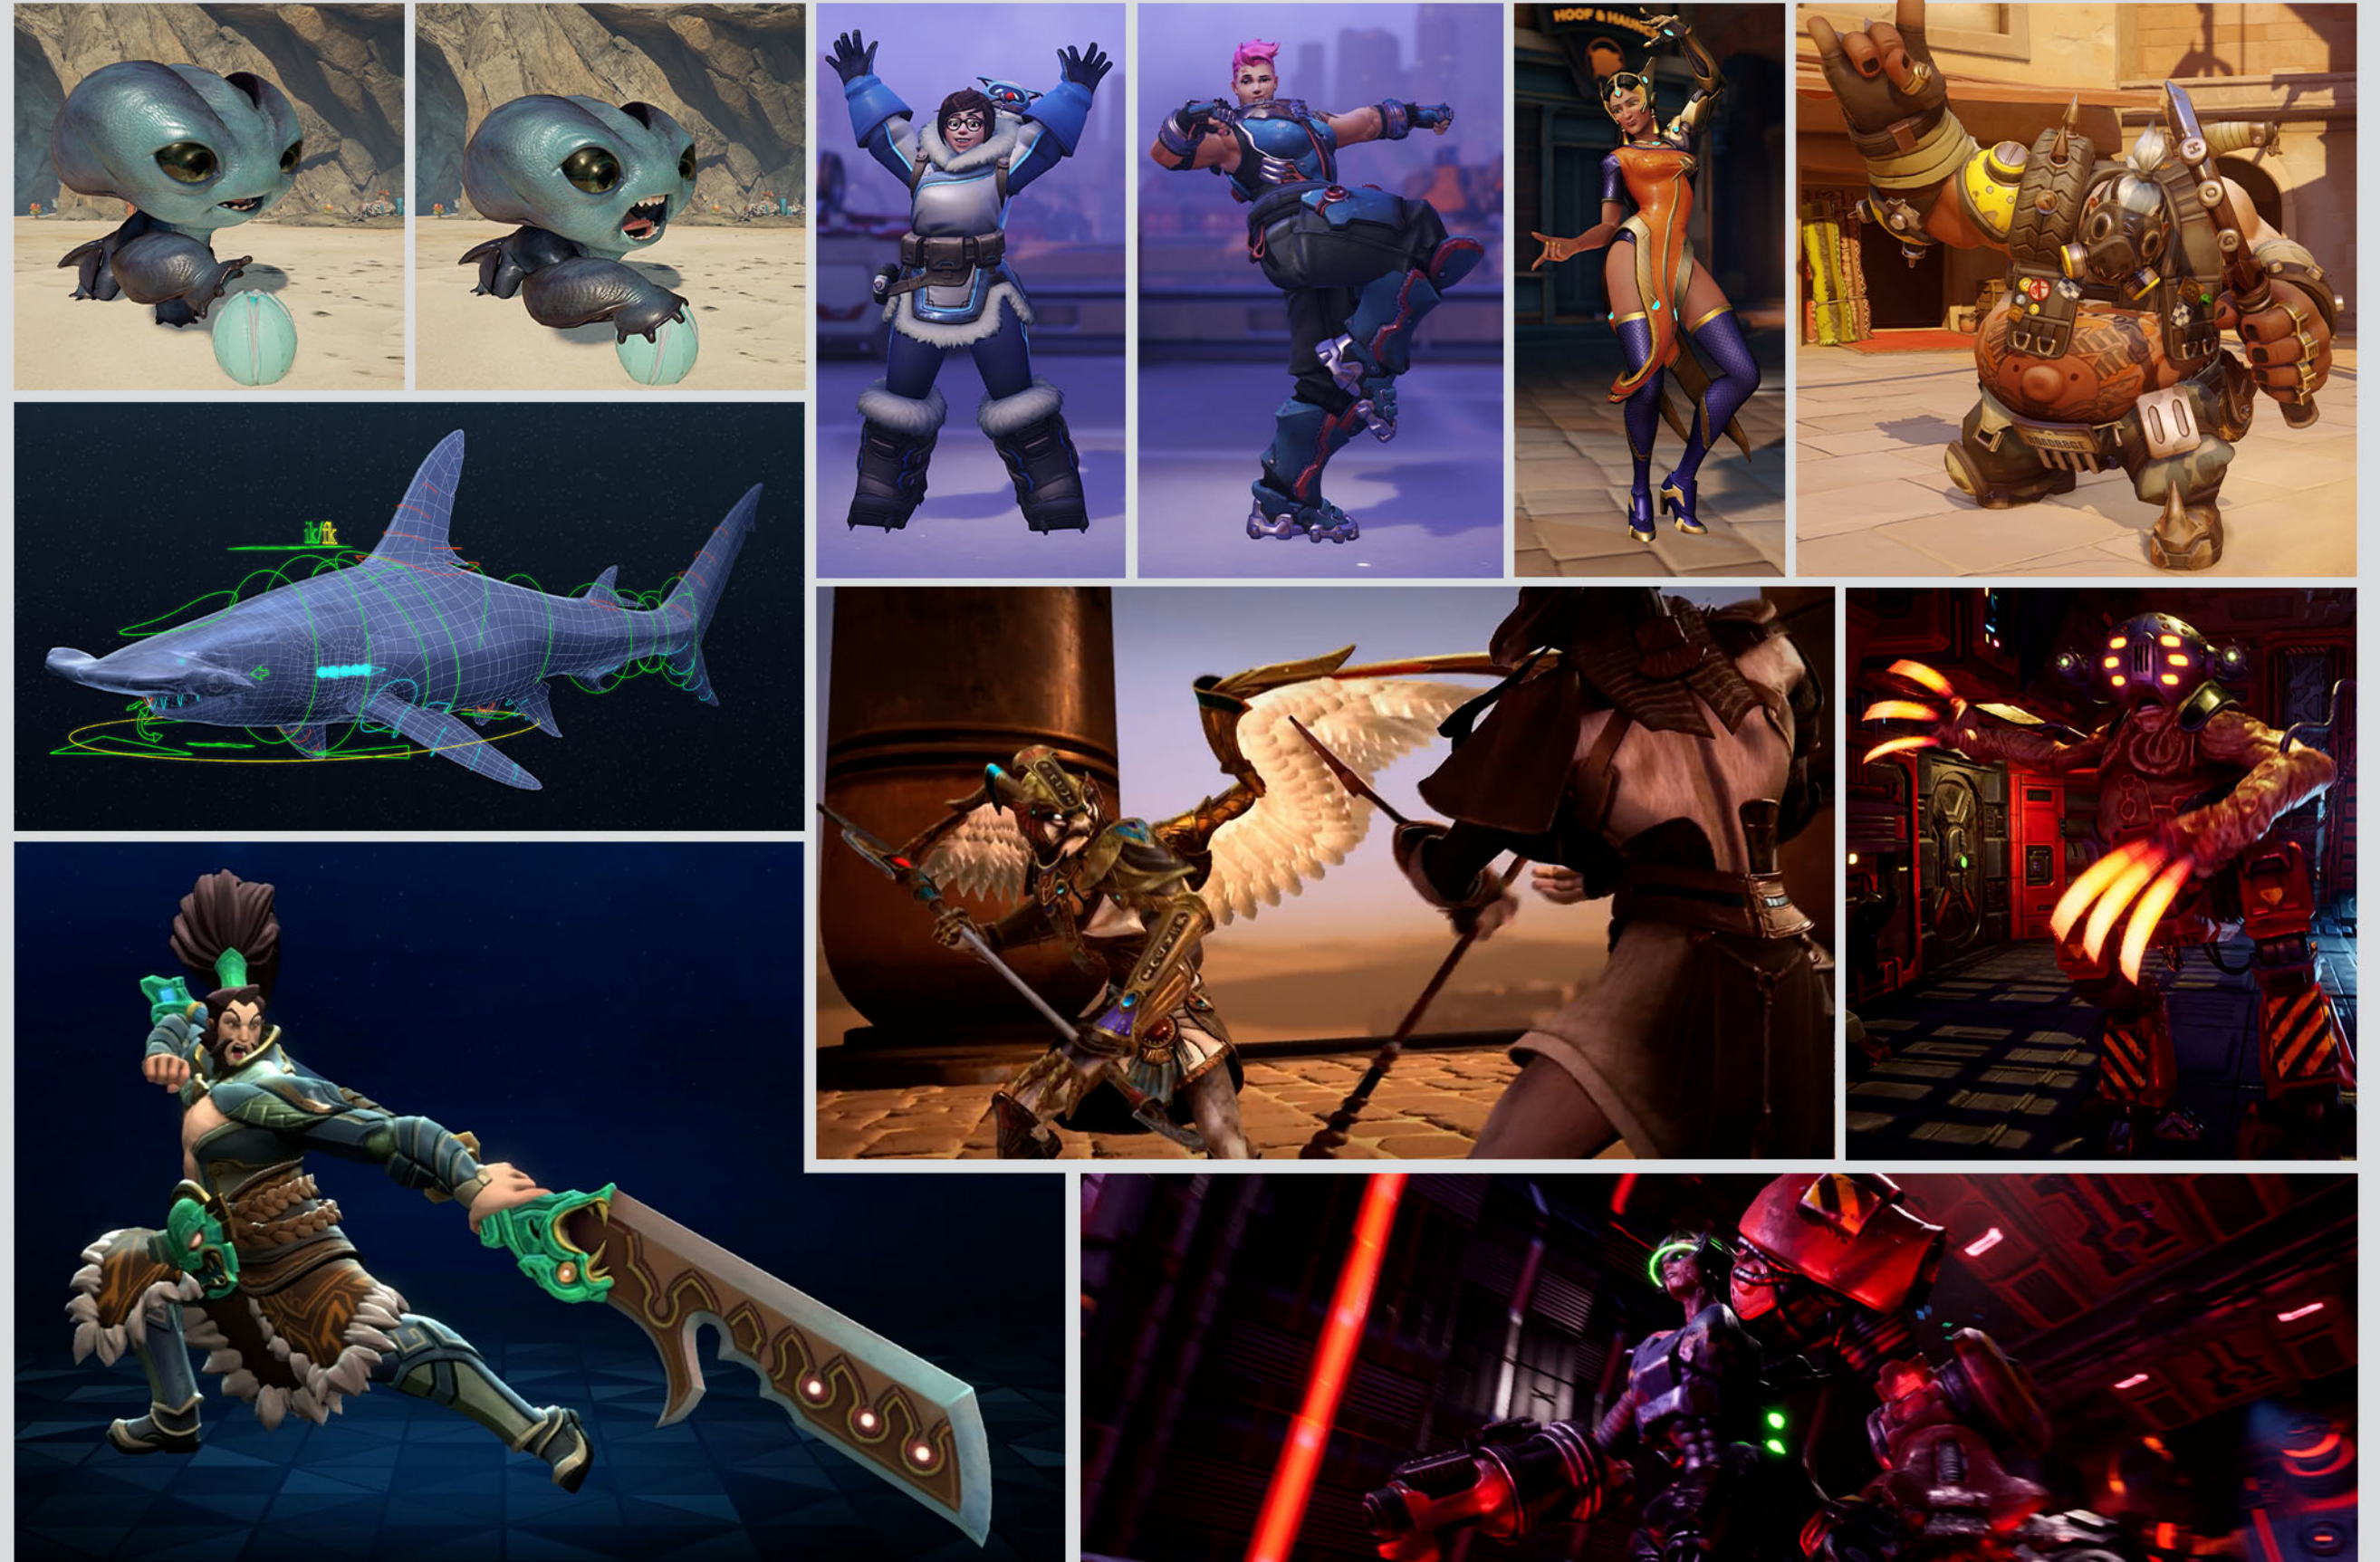

ANIMATION

...

Our animation team brings characters, creatures, and worlds to life with precision, energy, and style. From hyper-realistic motion to stylized, cartoony, or even stop-motion inspired work, we tailor our approach to match your project's vision. We animate both real-time gameplay and cinematic sequences, creating fluid combat, expressive performances, and engaging prop and environment movement that resonate with the audience.

We combine artistic skill with technical expertise, covering bipedal and quadrupedal characters, combat, gameplay animations, and camera choreography. Experienced in hand keyframe animation, motion capture cleanup, and engine-ready implementation (Unreal, Unity, and propriety engines), our animators ensure that your ideas not only move but integrate seamlessly into your production pipeline.

...

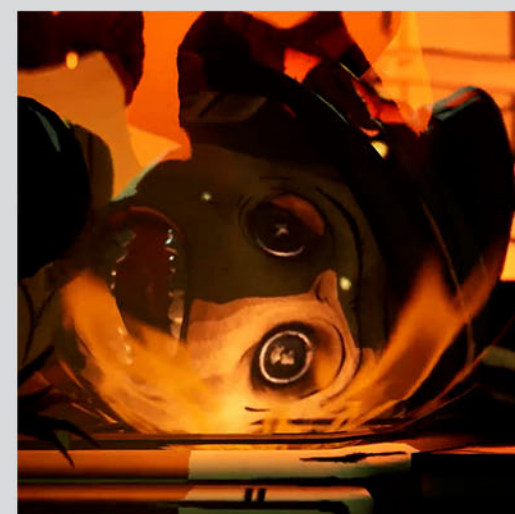

SUPERGENIUS

VFX

Our VFX team crafts immersive, high-impact visual effects that elevate gameplay, story, and cinematic experiences. From stylized magical bursts to hyper-realistic destruction, atmospheric effects, and interactive environmental elements, we adapt our approach to match any artistic vision. Whether it's character or combat interaction, complex shaders, or bespoke effects for hero abilities, we make every frame feel alive and integrated.

Beyond artistry, we pride ourselves on technical versatility. We optimize effects for Unity, Unreal, and proprietary engines, develop custom shaders, and quickly adapt to new software or pipelines as projects demand. With a focus on collaboration, planning, and seamless integration, our VFX artists ensure that every spark, explosion, or subtle particle system not only looks stunning but performs efficiently within your production framework.

THANK YOU

Thank you for taking the time to learn more about our studio! We're proud of the partnerships we've built and the projects we've helped bring to life, and we'd love the opportunity to do the same with you. Whether you're exploring early concept development, looking for production support, or need a trusted team to step in and deliver on tight deadlines, our artists and developers are here to help.

Please feel free to reach out through any of the contact options below. We look forward to the conversation and the chance to create something incredible together!
